For immediate release

Accelero XTREME 4870X2 Ultimate Cooling Weapon for ATI Radeon HD4870X2

(Pfäffikon/Switzerland, 18 February 2009) The Swiss low noise cooling solution provider ARCTIC COOLING today announced the launch of the **Accelero XTREME 4870X2**. Especially designed for the ATI Radeon HD4870X2, the **Accelero XTREME 4870X2** follows the sophisticated design of the Accelero XTREME series, offering the best cooling solution for this high-end VGA card.

Extreme cooling performance

Outstanding cooling comes from outstanding components. The **Accelero XTREME 4870X2** is equipped with three 92mm PWM fans running from 1,000 to 2,000 RPM, generating 81 CFM airflow which allows the fans to remove the heat from the two GPUs efficiently. The eight-heatpipe design also improves heat dissipation and achieves 320 Watts cooling capacity. The result is significant – the GPU temperature is 50°C lower than with the stock cooler. This enhances not only the overclock performance, but also extends the service life of your valuable graphics card.

Quiet cooling guaranteed

By using the low noise impeller and patented fan holder, the three 92mm PWM fans are incredibly quiet. Also thanks to the PWM function, the fans run just at necessary speed while offering sufficient cooling at the lowest noise level. Even running at full speed 2,000 RPM, the **Accelero XTREME 4870X2** operates almost in silent with only 0.5 Sone of sound, creating a much quieter gaming environment beyond anyone's imagination.

The **Accelero XTREME 4870X2** comes with a 6-year limited warranty. This product will be available by end of March 2009. The MSRP is US\$68.30 and 53.95€ (excluding VAT).

Dimensions	295 L x 96 W x 54 H mm
Fan	92mm x 3 fans
Fan speed	1,000 – 2,000 RPM (controlled by PWM)
Airflow	81 CFM / 138 m ³ /h
Max. cooling capacity	320 Watts
Bearing	Fluid Dynamic Bearing
Weight	680g
Compatibility	ATI Radeon HD 4870X2

About ARCTIC COOLING

ARCTIC COOLING Switzerland AG is the trusted leader in providing low noise thermal cooling solutions for PC. Its diversified product lines include CPU cooler, VGA cooler, case fan, PC case and PSU. The innovative engineering team excels in systematic noise reduction, heatsink development, customization of thermal solutions, low noise fan design, PC case and PSU elaboration. Headquartered in Pfäffikon, Switzerland, ARCTIC COOLING operates international offices in Hong Kong and the US providing local shipping, customer service and sales support for their regions.
