Freezer 7 LP **Low Profile CPU Cooler Optimised for Slim Cases**

(Pfäffikon/ Switzerland, 7 May 2008) Most small chassis users find it difficult to buy a suitable cooler replacement that fits the size of their PC case. As a leader in innovative, low noise and high performance PC coolers, ARCTIC COOLING today unveiled the **Freezer 7 LP**, a cutting edge Intel CPU cooler especially designed for media centre users to fulfill their needs.

Slim Beauty

The revolutionary heatsink design of the **Freezer 7 LP** reduces the size of the cooler dramatically, leaving it only 42mm slim (to the air intake level) and 263g light, almost half the size of usual CPU coolers. With this ultra thin dimension, the **Freezer 7 LP** easily fits into any small chassis with limited space.

Freeze and Breeze

Apart from its lightweight and low profile design, the **Freezer 7 LP** also performs excellent cooling execution. Two heatpipes, 40 fins and an 80mm PWM fan dissipate heat from the CPU core efficiently and rapidly. Together with the highly thermal conductive pre-applied MX-2 thermal paste and voltage regulator cooling, the **Freezer 7 LP** is 20% cooler than the generic low profile cooler, giving media centre users an unexpected cooling experience.

The Art of Silence

Like other ARCTIC COOLING products, low noise impellers and patented fan holder are used to minimize the noise level. Even though spinning at full load, the **Freezer 7 LP** generates only 0.5 Sone of noise – 71% quieter than the Intel low profile cooler.

The **Freezer 7 LP** is widely compatible with Intel Socket LGA775. It offers a 6-year limited warranty and will be available by mid-May 2008. The MSRP is US\$ 27.95 / 17,95 € (excl VAT).

Specifications

Dimensions	109 L x 108 W x 42 H (to air intake level) / 53 H (with fan holder) mm
Fan	80mm x 1
Fan speed	600 – 2000 RPM (controlled by PWM)
Air flow	28 CFM / 47.6 m ³ h
Max. cooling capacity	90 Watts
Weight	263g
Compatibility	Up to 90 Watts Intel Socket LGA 775

About ARCTIC COOLING

ARCTIC COOLING Switzerland AG is the trusted leader in providing low noise thermal cooling solutions for PC. Its diversified product lines including CPU cooler, VGA cooler, case fan, PC case and most recently, PSU. The innovative engineering team excels in systematic noise reduction, copper and aluminum heatsink development, customization of thermal solutions, low noise fan design, PC case and PSU elaboration. Headquartered in Pfäffikon, Switzerland, ARCTIC COOLING operates international offices in Hong Kong and the US providing local shipping, customer service and sales support for their regions.
